

Services Provider Use Rights

Publication Date: March 15, 2024

Table of Contents

To refresh the Table of Contents page numbering, select the Table of Contents below by clicking anywhere on the Table of Contents. Note: Ensure editing is enabled on your word document. Once you select the Table of Contents, right click on the Table of Contents. A dialog box will display. Select Update Field in the dialog box. A new popup will display that allows you to Update the Table of Contents. Select "Update page numbers only". Select the "OK" button to complete the refresh. Table of Content page numbering will update below.

Introduction

About this Document

This copy of the Services Provider Use Rights has been downloaded from <https://www.microsoft.com/licensing/spur/> for the date indicated on the title page and based on the selected products.

Access to the Word document versions of the SPUR are available at <https://aka.ms/licensinguserightsSPUR>.

Summary of Changes

Below is a summary of changes and updates to the most recently published version of the SPUR.

March 15, 2024

Windows Server: Updated *Azure Virtual Desktop with Windows Server Functionality terms* to clarify when customers can use the Microsoft Azure Hybrid Benefit.

Universal License Terms

The license terms that apply to the use of each licensed Product are the Universal License Terms, the applicable License Model terms and any Product-Specific License Terms in the Product Entry.

Universal License Terms

These license terms apply to Customer's use of all Microsoft software licensed under Customer's SPLA.

Definitions

Terms used and not defined in this document have the meanings assigned to them in Customer's SPLA.

Customer's Use Rights

If Customer complies with its SPLA, including the SPUR, Customer may use the software as expressly permitted in the SPUR. Customer needs a License for each Product and separately licensed functionality used on a device or by a user.

Rights to Use Other Versions

For any permitted copy or Instance, Customer may create, store, install, run or access in place of the version licensed, a copy or Instance of a prior version, different permitted language version, different available platform version (for example, 32 bit or 64 bit) or a permitted lower edition. The use rights for the licensed version still apply. Licenses for prior versions and lower editions do not satisfy the licensing requirements for a Product.

Applicable Use Rights

The license terms in the SPUR when Customer first provides Software Services with a version of a Product remain in effect for the term of Customer's SPLA, subject to the following: (1) if Microsoft introduces a new version of a Product and Customer uses the new version, Customer must abide by the license terms for the new version; and (2) if Customer provides Software Services with an earlier version of a Product (a "Downgrade"), and the Downgrade contains components that are not part of the Product version identified in the applicable SPUR, then the License Terms specific to those components from the SPUR last associated with the Downgrade will apply to those components.

Use of Listed Providers

Customer may use a Data Center Provider (for DCP eligible Products) or an Outsourcing Company that is a Listed Provider (or that uses a Listed Provider as a means of providing services to Customer) through September 30, 2025.

Disaster Recovery Rights

For each Instance of eligible server software licensed in the Per Processor, Per Core (Applications), Per Core (OS), or Per Core (Management) licensing models that Customer runs in a Physical OSE or Virtual OSE on a Licensed Server, Customer may temporarily run a backup Instance in a Physical OSE or Virtual OSE on a Server dedicated to disaster recovery. The license terms for the software and the following limitations apply to Customer's use of software on a disaster recovery server.

Permitted Periods of Use

The disaster recovery server can run only during the following exception periods:

- For brief periods of disaster recovery testing within one week every 90 days.
- During a disaster, while the production server being recovered is down.
- Around the time of a disaster, for a brief period, to assist in the transfer between the primary production server and the disaster recovery server.

Conditions on Use

In order to use the software under disaster recovery rights, Customer must comply with the following terms:

- The disaster recovery server must not be running at any other times except as above.
- The disaster recovery server may not be in the same cluster as the production server.
- Use of the software on the disaster recovery server must comply with the license terms for the software.
- Once the disaster recovery process is complete and the production server is recovered, the disaster recovery server must not be running at any other times except those times allowed here.

Use of Windows Server

Windows Server [Licenses](#) are not required for the disaster recovery server if the following conditions are met:

- The Hyper-V role within Windows Server is used to replicate [Virtual OSEs](#) from the production server at a primary site to a disaster recovery server.
- The disaster recovery server is used only to:
 - run hardware virtualization software, such as Hyper-V,
 - provide hardware virtualization services,
 - run software agents to manage the hardware virtualization software,
 - serve as a destination for replication,
 - receive replicated [Virtual OSEs](#), test failover, and await failover of the [Virtual OSEs](#), and
 - run disaster recovery workloads as described above.

Third Party Software

The software may contain third party proprietary programs or components that are licensed under separate terms that are presented to Customer during installation or in the "ThirdPartyNotices" file accompanying the software. The software may also contain third party open source programs that Microsoft, not the third party, licenses to Customer under Microsoft's license terms.

Pre-Release Code, Updates or Supplements, Additional Functionality

Microsoft may offer updates or supplements to the Products. Customer may use the updates or supplements to the Products, pre-release code, additional functionality and optional add-on services to the Products, subject to specific terms (if any) that accompany them. Some Products require automatic updates, as described in the Product-Specific License Terms.

Restrictions

Customer may not (and is not licensed to) rent the software, work around any technical limitations in the Products or restrictions in Product documentation, or separate the software for use in more than one [OSE](#) under a single [License](#) or [Licensed Server](#) (even if the [OSEs](#) are on the same physical hardware system), unless expressly permitted by Microsoft. Rights to access the software on any device do not give Customer any right to implement Microsoft patents or other Microsoft intellectual property in the device itself or in any other software or devices.

License Assignment and Reassignment

Before Customer uses software under a [License](#), it must assign that [License](#) to a device or user, as appropriate. Customer may reassign a [License](#) to another device or user, but not during the same calendar month, unless the reassignment is due to (i) permanent hardware failure or loss, or (ii) temporary reallocation of [SALs](#) to cover a user's absence or the unavailability of a device that is out of service. Customer must remove the software or block access from the former device or to the former user.

Technical Measures

Some Products are protected by technological measures and require activation or validation, as well as a product key, to install or access them.

Activation and validation

Successful activation or validation verifies that a software Product has been correctly installed, the product key is not stolen, and that no changes have been made to validation, licensing, or activation functions of the software. Customer's right to use the software after the time specified in the software Product may be limited unless it is activated. Customer is not licensed to continue using the software if it has unsuccessfully attempted to activate. Each device that has not activated by a Key Management Service (KMS) must use a Multiple Activation Key (MAK). Customer may not circumvent activation or validation.

Product Keys

An assigned product key is required for licensed use of the software. All product keys are Confidential Information of Microsoft. Notwithstanding anything to the contrary in Customer's volume licensing agreement, Customer may not disclose product keys to third parties. Customer may not provide unsecured access to its KMS machines over an uncontrolled network. In the event of unauthorized use or disclosure of product keys or KMS keys, Microsoft may prevent further activations, deactivate or block product keys from activation or validation, and take other appropriate action.

Notices

Where indicated in each Product Entry, the following notices apply:

Internet-based Features

Software Products may contain features that connect and send information over the Internet, without additional notice to Customer, to Microsoft's systems and those of its Affiliates and services providers. Use of that information is described in the privacy statement available in each software Product.

Bing Maps

The Product includes use of Bing Maps. Any content provided through Bing Maps, including geocodes, can only be used within the product through which the content is provided. Customer's use of Bing Maps is governed by the Bing Maps End User Terms of Use available at <http://go.microsoft.com/?linkid=9710837> and the Bing Maps Privacy Statement available at <http://go.microsoft.com/fwlink/?LinkID=248686>.

H.264/AVC Visual Standard, the VC-1 Video Standard, and the MPEG-4 Part 2 Visual Standard

This software may include H.264/AVC, VC-1, and MPEG-4 Part 2 visual compression technology. MPEG LA, L.L.C. requires this notice: THIS PRODUCT IS LICENSED UNDER THE AVC, THE VC-1, THE MPEG-4 PART 2 VISUAL PATENT PORTFOLIO LICENSES FOR THE PERSONAL AND NON-COMMERCIAL USE OF A CONSUMER TO (i) ENCODE VIDEO IN COMPLIANCE WITH THE ABOVE ("VIDEO STANDARDS") AND/OR (ii) DECODE AVC, VC-1, MPEG-4 PART 2 VIDEO THAT WAS ENCODED BY A CONSUMER ENGAGED IN A PERSONAL AND NON-COMMERCIAL ACTIVITY AND/OR WAS OBTAINED FROM A VIDEO PROVIDER LICENSED TO PROVIDE SUCH VIDEO. NO LICENSE IS GRANTED OR SHALL BE IMPLIED FOR ANY OTHER USE. ADDITIONAL INFORMATION MAY BE OBTAINED FROM MPEG LA, L.L.C. SEE www.mpegla.com. For clarification purposes, this notice does not limit or inhibit the use of the software for normal business uses that are personal to that business which do not include (i) redistribution of the software to third parties, or (ii) creation of content with the VIDEO STANDARDS compliant technologies for distribution to third parties.

Malware protection

Microsoft cares about protecting customers' devices from malware. The software will turn on malware protection if other protection is not installed or has expired. To do so, other antimalware software will be disabled or may have to be removed.

Font Components, Images, and Sounds

While Customer runs the software, it may access and use icons, images, sounds and media included with the software only from a Licensed Device and may use the fonts included with or installed by that software to display and print content. Customer may only embed fonts in content as permitted by the embedding restrictions in the fonts; and temporarily download them to a printer or other output device to print content.

Included Technologies

Products may include other Microsoft technology components subject to their own license terms, as indicated in the Product Entry. If separate terms for these components are not addressed in the Product-Specific License Terms, they may be found in a separate folder in the Product's installation directory or through the Product's unified installer.

Benchmark Testing

Customer must obtain Microsoft's prior written approval to disclose to a third party the results of any benchmark test of any Server Product. This does not apply to the .NET Framework.

Software Plus Services

Microsoft may provide services with Products through software features that connect with Microsoft or services provider computer systems over the Internet. It may change or cancel the services at any time. Customer may not use the services in any way that could harm them or impair anyone else's use of them. Customer may not use the services to try to gain unauthorized access to any service, data, account or network by any means.

Third Party Internet Sites

Customer and its customers may link to third party Internet sites through the use of the Products. Microsoft does not control the third party sites. Microsoft is not responsible for the contents of any third party sites, any links contained in third party sites, or any changes to third party sites. Microsoft provides these links to third party sites only as a convenience. The inclusion of any link does not imply an endorsement by Microsoft of the third party site.

Multiplexing

Multiplexing or pooling to reduce direct connections with the software does not reduce the number required Licenses.

Creating and Storing Instances of Servers or Storage Media

For any License Customer acquires, Customer may create and store Instances of the corresponding software solely to exercise its right to use Running Instances of software under that License as permitted in this document.

Distributable Code

The software may include code that Customer is permitted to distribute in programs it develops if it complies with the terms below. For purposes of this subsection, "Customer" also includes Customer's End Users.

Right to Use and Distribute

The code and text files listed below are "Distributable Code."

- **REDIST.TXT Files:** Customer may copy and distribute the object code form of code listed in REDIST.TXT files and in OTHER-DIST.TXT files, as well as any code marked as "Silverlight Libraries", Silverlight "Client Libraries" and Silverlight "Server Libraries".
- **Sample Code, Templates, and Styles:** Customer may modify, copy, and distribute the source and object code form of code marked as "sample", "template", "simple styles" and "sketch styles."
- **Third Party Distribution:** Customer may permit distributors of its programs to copy and distribute the Distributable Code as part of those programs.
- **Image Library:** Customer may copy and distribute images, graphics and animations in the Image Library as described in the software documentation.

Distribution Requirements

If Customer distributes any Distributable Code Customer must:

- Only distribute it with Customer's programs, where Customer's programs provide significant primary functionality to the Distributable Code;
- require distributors and external end users to agree to terms that protect the Distributable Code at least as much as Customer's volume licensing agreement, including the SPUR;
- indemnify, defend, and hold harmless Microsoft from any claims, including attorneys' fees, related to the distribution or use of Customer's programs, except to the extent that any claim is based solely on the Distributable Code included in Customer's programs.

Distribution Limitations

Customer may not:

- alter any copyright, trademark or patent notice in the Distributable Code;

- use Microsoft's trademarks in Customer's programs' names or in a way that suggests its programs come from or are endorsed by Microsoft;
- distribute Distributable Code in or with any malicious or, deceptive programs or in an unlawful manner; or
- modify or distribute the source code of any Distributable Code so that any part of it becomes subject to an Excluded License. An Excluded License is one that requires, as a condition of use, modification or distribution, that the code be disclosed or distributed in source code form, or that others have the right to modify it.

Glossary

Terms defined in this Glossary apply unless otherwise defined in product specific terms.

Attributes

Attributes are identified in the table in each Product Entry, and indicate rights or conditions applicable to acquisition or use of the Products.

Access License Requirement: Indicates whether or not a [Server](#) or Desktop Application Product requires [SALs](#) for access by users and devices or Managed [OSEs](#).

Additional Software: Software that Customer is permitted to use on any device in conjunction with its use of server software.

Client Software: Indicates components of a Product that are licensed as Client Software, as that term is defined in Customer's SPLA.

Date Available: The date a Product is first available, designated as month/year.

DCP Eligible: Permits Customer to use [Data Center Provider](#), as that term is defined in this SPUR.

Disaster Recovery: Rights available to Customer to use software for conditional disaster recovery purposes; refer to [Universal License Terms](#), [Disaster Recovery](#), for details.

Down Editions: Permitted lower editions corresponding to specified higher editions. Customer may use the permitted lower edition in place of a licensed higher-level edition, as permitted in the [Universal License Terms](#).

Fail-Over Rights: Permits Customer to run passive fail-over [Instances](#) of the Product in conjunction with software running on the [Licensed Server](#), in anticipation of a fail-over event. Passive fail-over [Instances](#) may be run in either a separate [OSE](#) on the [Licensed Server](#) or on a different [Server](#) dedicated to Customer's use. Fail-Over Rights apply only if the number of [Licenses](#) that otherwise would be required to run the passive fail-over [Instances](#) does not exceed the number of [Licenses](#) required to run the corresponding production [Instances](#).

Included Technologies: Indicates other Microsoft components included in a Product; refer to the Included Technologies section of [Universal License Terms](#) for details.

License Mobility: Permits [License](#) reassignment from one of Customer's [Servers](#) to another one of Customer's [Servers](#) in the same [Server Farm](#) during the same calendar month.

License Terms: Terms and conditions governing deployment and use of a Product.

Prerequisite: Indicates that certain additional conditions must be met in order to purchase [Licenses](#) for the Product.

Prior Version: Earlier versions of Product.

Notices: Identifies the notices applicable for a Product; refer to the Notices section of the [Universal License Terms](#) for details.

Product-Specific License Terms: Indicates that Product-Specific terms and conditions govern deployment and use of the Product.

Definitions

Capitalized terms used but not defined in the SPUR will have the definition provided in the SPLA. The following definitions also apply:

Client OSE means an [OSE](#) running a client operating system.

Core Factor means a numerical value associated with a specific [Physical Processor](#) for purposes of determining the number of [Licenses](#) required to license all of the [Physical Cores](#) on a [Server](#).

Data Center Provider means an entity that (1) provides Software Services, usually infrastructure services, to another Services Provider, using Products licensed from Microsoft through the entity's own SPLA; and (2) except as expressly permitted in this SPUR, is not a Listed Provider.

ERP Solution means the components of the software that control Customer's End user's users and financial reporting units.

External Users means users that are not either Customer's End User's or its Affiliates' employees, or its or its affiliates' onsite contractors or onsite agents.

Hardware Thread means either a Physical Cores or a hyper-thread in a Physical Processor.

Host Fabric means a collection of Physical OSE and Virtual OSEs that are configured and operated as a unit to provide virtualization, networking, management and file services.

Instance means an image of software that is created by executing the software's setup or install procedure or by duplicating an existing Instance.

License means the right to download, install, access and use a Product.

Licensed Device means a single physical hardware system to which a License is assigned. For purposes of this definition, a hardware partition or blade is considered to be a separate device.

Licensed Server means a single Server to which a License is assigned. For purposes of this definition, a hardware partition or blade is considered to be a separate Server.

Licensed User means the single person to whom a License is assigned.

Listed Provider means any entity identified by Microsoft at <https://www.aka.ms/listedproviders> or a successor site, as may be updated from time to time.

Manage OSE means to solicit or receive data about, configure, or give instructions to the hardware or software that is directly or indirectly associated with the OSE. It does not include discovering the presence of a device or OSE.

Operating System Environment (OSE) means all or part of an operating system Instance, or all or part of a virtual (or otherwise emulated) operating system Instance which enables separate machine identity (primary computer name or similar unique identifier) or separate administrative rights, and instances of applications, if any, configured to run on the operating system Instance or parts identified above. A physical hardware system can have one Physical OSE and/or one or more Virtual OSE.

Outsourcing Company means a third party that (1) performs data center management services or installation services for Customer; (2) has an active Microsoft partner identification number; and (3) except as expressly permitted in this SPLA, is not a Listed Provider.

Physical Core means a core in a Physical Processor.

Physical OSE means an OSE that is configured to run directly on a physical hardware system. The operating system Instance used to run hardware virtualization software or to provide hardware virtualization services is considered part of the Physical OSE.

Physical Processor means a processor in a physical hardware system.

Running Instance means an Instance of software that is loaded into memory and for which one or more instructions have been executed. (Customer "Runs an Instance" of software by loading it into memory and executing one or more of its instructions.) Once running, an Instance is considered to be running (whether or not its instructions continue to execute) until it is removed from memory.

SAL means Subscriber Access License, which may be assigned by user or device, as appropriate. A user SAL allows access to the corresponding software from any device by one user or management of any Client OSE used by one user. A device SAL allows access to the corresponding software from one device by any user. One OSE SAL permits management of one OSE accessed by any user. A Student SAL may be assigned to Qualified Educational End Users as defined in the Qualified Educational Customer Addendum.

SALs for SA means SALs that may be acquired and assigned to users who have also been assigned a qualifying Client Access License (or CAL) with active Software Assurance (or SA) acquired under a Microsoft Volume Licensing Program or who uses a device to which a qualifying Device CAL with SA has been assigned. The right to assign a SAL for SA to a user or device expires when the SA for the qualifying CAL expires. SALs for SA may only be reassigned, and must be reassigned, when and as the qualifying CAL is reassigned.

Server means a physical hardware system capable of running server software.

Server Farm means a single data center or two data centers each physically located either in time zones not more than four hours apart, and/or within the European Union (EU) and/or European Free Trade Association (EFTA). A data center can be moved from one [Server Farm](#) to another, but not on a short-term basis.

Suite means a Product that is comprised of components that are also licensed separately. A [Suite](#) is licensed under a single [License](#) that is assigned to a single user or device, and allows use of all of its components on the single device or by a single user to which it is assigned. The components of the [Suite](#) may not be separated and used on separate devices or by separate users.

Virtual Core means the unit of processing power in a virtual hardware system. A [Virtual Core](#) is the virtual representation of one or more [Hardware Threads](#).

Virtual OSE means an [OSE](#) that is configured to run on a virtual hardware system.

Windows Server Container with Hyper-V isolation (formerly known as, Hyper-V Container) is a container technology in Windows Server which utilizes a virtual operating system environment to host one or more Windows Server Container(s). Each Hyper-V isolation instance used to host one or more Windows Server Container is considered one virtual operating system environment.

Windows Server Container without Hyper-V isolation (formerly known as Windows Server Container) is a feature of Windows Server software.

Windows Software Components means components of Windows software, including Microsoft .NET Framework, Microsoft Data Access Components, PowerShell software and certain .dlls related to Microsoft Build, Windows Identity Foundation, Windows Library for JAVAScript, Dbghelp.dll, and Web Deploy technologies.

Advanced Threat Analytics

Product Version and Edition	Date Available
Advanced Threat Analytics 2016 Client (SAL)	August 2015

Use Rights

License Terms: Universal License Terms	Product-Specific License Terms : Yes	Access License Requirement : Yes
DCP Eligible : Yes	Included Technologies : SQL Server	

Country Restrictions

Neither Customer nor any End User may use Advanced Threat Analytics 2016 in the People's Republic of China.

License Model

Subscriber Access Licenses (SALs) for Management Servers

Access License

1. Provided it acquires one or more [SALs](#), Customer may use any number of [Running Instances](#) of the software to [Manage OSEs](#) on [Licensed Devices](#) or devices used by [Licensed Users](#).
2. Customer must acquire a [SAL](#) for each [OSE](#) or each user of [OSEs](#) Customer uses the software to Manage.
3. [SALs](#) do not permit [Management of any OSE](#) running a server operating system.

Access Licenses

Server Software Access

Subscriber Access License	Advanced Threat Analytics 2016 Client OSE SAL (device or user)
---------------------------	--

Usage Requiring SAL

Licenses are required only for Client OSEs (or OSEs running Server operating systems and used as Client OSEs) that are on or accessed by end user devices authenticated by an Active Directory managed by Advanced Threat Analytics.

BizTalk Server

Product Version and Edition	Date Available
BizTalk Server 2020 Enterprise (Core License)	February 2020
BizTalk Server 2020 Standard (Core License)	February 2020
BizTalk Server 2020 Branch (Core License)	February 2020

Use Rights

License Terms: Universal License Terms	Product-Specific License Terms : Standard and Branch editions	Prior Version : BizTalk Server 2016
Additional Software : All editions	Client Software : All editions (includes Additional Software)	Disaster Recovery : All editions
Included Technologies: Windows Software Components	License Mobility : Yes	

Additional Terms for BizTalk Server Standard and BizTalk Server Branch

Use Limitation

Customer may not use the server software, including the Master Secret Server, on a Server that is part of a networked cluster or in an OSE that is part of a networked cluster of OSEs on the same Server.

Office Web Component

Customer may use the Office Web Component only to view and print copies of static documents, text and images created with the software. Customer does not need separate licenses for copies of the component.

Additional Terms for BizTalk Server Branch

Customer may use Running Instances of the software on Licensed Servers only at the endpoint of its internal network (or edge of its organization) to connect business events or transactions with activities processed at that endpoint. The Licensed Server may not:

- act as the central node in a "hub and spoke" networking model;
- centralize enterprise-wide communications with other Servers or devices; or
- automate business processes across divisions, business units, or branch offices.

Licensing Use of Host Integration Server (HIS)

Customer may use HIS server software and Additional Software under the terms and conditions of the Per Core (Applications) License Model using BizTalk Server core licenses. Customer may use HIS Additional Software (e.g., HIS Client) only in conjunction with its licensed use of HIS server software. The rights applicable to this use are determined by which edition and version of BizTalk Server licenses Customer assigns to the Server (e.g., unlimited virtualization rights require BizTalk Server Enterprise licenses). Use of HIS server software is limited to branch office deployments if used under the BizTalk Server Branch Edition licenses).

Additional Software

Administration and Monitoring Tools	ADOMD.NET	BizTalk Server Related Schemas and Templates
Business Activity Monitoring ("BAM") Client	BAM Alert Provider for SQL Notification Services	BAM Event APIs and Interceptors and Administration Tools
Business Activity Services	Business Rules Component	Development Tools
HTTP Receive Adapter	Master Secret Server/Enterprise Single Sign-On	MQHelper.dll
MQSeries Agent	MSXML	SOAP Receive Adapter

Software Development Kit(s)	SQLXML	UDDI
Windows Communication Foundation Adapters	Windows SharePoint Services Adapter Web Services	

License Model

Per Core (Applications)

For Products under the Per Core (Applications) License Model, Customer must choose either licensing by Physical Core on a Server or licensing by Individual Virtual OSE. The terms for each are set forth below.

Server Licenses (per core) – Licensing by Physical Core on a Server

- Customer may use the server software on a Licensed Server, provided it acquires sufficient Licenses as described below.
- The number of Licenses required equals the number of Physical Cores on the Licensed Server subject to a minimum of four per core Licenses per Physical Processor.
- For enterprise editions, Customer may use any number of Running Instances of the server software on the Licensed Server in the Physical OSE and/or any number of Virtual OSEs.
- For other editions Customer may use any number of Running Instances of the server software only in the Physical OSE on the Licensed Server.

Server Licenses (per core) – Licensing by Individual Virtual OSE

- Customer may use any number of Running Instances of the server software in any Virtual OSE on the Licensed Server, provided it acquires sufficient Licenses as described below.
- The number of Licenses required equals the number of Virtual Cores in the Virtual OSE, subject to a minimum of four License per Virtual OSE.
- If any Virtual Core is at any time mapped to more than one Hardware Thread, Customer needs a License for each Hardware Thread to which it is mapped.

Microsoft Developer Tools

Azure Dev Ops Server

Product Version and Edition	Date Available
Azure DevOps Server 2022	November 2022
Azure DevOps Server 2022 Basic (SAL)	November 2022

Use Rights

<u>License Terms</u> : Universal License Terms	<u>Product-Specific License Terms</u> : All editions	<u>Prior Version</u> : Azure DevOps Server 2020
<u>Additional Software</u> : All editions	<u>Client Software</u> : Includes all Additional Software	<u>DCP eligible</u> : All editions
<u>Included Technologies</u> : SQL Server Technology		

SAL Waiver

A SAL is not required for users: to view, edit, or enter work items, to access Azure DevOps Server Reporting, for accessing Azure DevOps Services via a Azure DevOps Server Proxy, to provide approvals to stages as part of the Release Management pipeline, and to access Azure DevOps Server through a pooled connection from another integrated application or service.

Third Party Licensing Terms for Open Components

Licensed User may not reverse engineer, decompile or disassemble the software, or otherwise attempt to derive the source code for the software, except and to the extent required by third party licensing terms governing use of certain open source components that may be included in the software.

SQL Server Technology

Customer may run any number of Instances of any SQL Server database software included in the Product in one OSE for the limited purpose of supporting that Product and any other Product that includes SQL Server database software.

Azure DevOps Server Build Services

If Customer has one or more Licensed Users of Visual Studio Enterprise or Visual Studio Professional, then Customer may also install the Visual Studio software and permit access and use of it as part of Azure DevOps Server Build Services by Customer's Licensed Users of Azure DevOps Server.

Additional Software

Azure DevOps Build Services

License Model

Subscriber Access Licenses (SALs) for Server Software

Access License

1. Provided it acquires one or more SALs for the software, Customer may use any number of Running Instances of the server software.
2. Customer must acquire a SAL for each user or device authorized by Customer to access the server software regardless of actual access.

Access Licenses

Server Software Access

Subscriber Access License	Azure DevOps Server 2022 Basic SAL (user)
---------------------------	---

Additional Functionality

Test Plan	
Additive Access License	Azure DevOps Server 2022 SAL
	Visual Studio Enterprise 2022 SAL (user)
	Visual Studio Test Professional 2022 SAL

Visual Studio

Product Version and Edition	Date Available
Visual Studio Enterprise 2022 (SAL)	November 2021
Visual Studio Professional 2022 (SAL)	November 2021
Visual Studio Test Professional 2022 (SAL)	November 2021

Use Rights

License Terms: Universal License Terms	Product-Specific License Terms : All editions	Prior Version : Visual Studio 2019
--	---	--

Access License Requirement : All Editions	DCP Eligible : All editions	Included Technologies : SQL Server Technology, Windows Software Components , Microsoft SharePoint, Windows SDK, Microsoft Office Components, Microsoft Advertising SDK
Notices : Internet-based Features, Bing Maps, H.264/MPEG-4 AVC and/or VC-1		

Build Devices and Visual Studio Build Tools

Customer may install copies of the files from Visual Studio Professional, Visual Studio Enterprise, or from Visual Studio Build Tools onto its build devices, including physical devices and virtual machines or containers on those devices, or hosted on Microsoft Azure for Customer, (collectively, "Build Devices"). [Licensed Users](#) may use these files on Customer's Build Devices solely to compile, build, and verify programs developed by using Visual Studio Professional or Visual Studio Enterprise, or to run quality or performance tests of those programs as part of the build process.

Utilities

Customer may copy and install the Utilities listed at <https://aka.ms/vs/16/utilities> onto its devices solely to debug and deploy programs and databases that Customer's [Licensed Users](#) develop with the Visual Studio Professional and Visual Studio Enterprise. Utilities are designed for temporary use. Microsoft may not be able to patch or update Utilities separate from the Visual Studio software, and some Utilities by their nature may make it possible for others to access devices on which the Utilities are installed. Customer should delete all the Utilities installed onto a device when finished debugging or deploying [Licensed Users'](#) programs and databases. Microsoft is not responsible for any third-party use or access of devices, or of the programs or databases on devices, on which the Utilities have been installed.

Third Party Licensing Terms for Open Source Components

Licensed User may not reverse engineer, decompile or disassemble the software, or otherwise attempt to derive the source code for the software, except and to the extent required by third party licensing terms governing use of certain open source components that may be included in the software.

Developing Extensions

1. **Limits on Extensions.** Customer may not develop or enable others to develop extensions for Visual Studio Professional or Visual Studio Enterprise (or and other component of the Visual Studio family of products) which circumvent the technical limitations implemented in the software. If Microsoft technically limits or disables extensibility for the software, Customer may not extend the software by, among other things, loading or injecting into the software any non-Microsoft add-ins, macros, or packages; modifying the software registry settings; or adding features or functionality equivalent to that found in the Visual Studio family of products.
2. **No Degrading the Software.** If Customer develops an extension for Visual Studio Professional or Visual Studio Enterprise (or any other component of the Visual Studio family of products), Customer must test the installation, uninstallation, and operation of its extension to ensure that such processes do not disable any features or adversely affect the functionality of Visual Studio Professional or Visual Studio Enterprise (or such component) or of any previous version or edition thereof.

Code Inspection

The software includes an optional feature enabling inspection of binary code and reproduction of source code from binary code. Customer agrees to use such feature only to inspect or reproduce software as authorized by its owner or applicable law.

Distributable Code

Visual Studio Professional and Visual Studio Enterprise contains code and text files that Customer is permitted to distribute in programs its [Licensed Users](#) develop while using such software.

Right to Use and Distribute

The code and text files listed below are "Distributable Code".

- **Distributable List.** Customer may copy and distribute the object code form of code listed on the Distributable List located at <https://aka.ms/vs/16/redistribution>.

- **Sample Code, Templates, and Styles.** Customer may copy, modify, and distribute the source and object code form of code marked as "sample", "template", "simple styles", and "sketch styles".
- **Third-party Distribution.** Customer may permit distributors of its programs to copy and distribute the Distributable Code as part of those programs.

Downgrade Rights

Customer may use only the version of the software immediately preceding the current version as permitted under "Rights to Use Other Versions" in the [Universal License Terms](#).

Modification Right

The software may include plug-ins, runtime, and other components identified in printed or online documentation that allow Customer to extend its functionality. Customer may modify or create derivative works of these components and use those derivative works, but only with the software and only for Customer's internal purposes.

Microsoft Dynamics AX Standard Commerce Server Core -- Core Factor

The License minimum per processor does not apply to Microsoft Dynamics AX Standard Commerce Server Core. The number of Licenses required equals the number of [Physical Cores](#) on the [Licensed Server](#) multiplied by the applicable [Core Factor](#) located at <http://go.microsoft.com/fwlink/?LinkID=229882>.

Additional Software

Microsoft Dynamics AX 2012 R3 Windows Rich Client Software	Management Reporter 2012 for Microsoft Dynamics AX Designer Client Software
--	---

License Model

Per Core (Applications)

For Products under the Per Core (Applications) License Model, Customer must choose either licensing by [Physical Core](#) on a [Server](#) or licensing by Individual [Virtual OSE](#). The terms for each are set forth below.

Server Licenses (per core) – Licensing by Physical Core on a Server

- Customer may use the server software on a [Licensed Server](#), provided it acquires sufficient [Licenses](#) as described below.
- The number of [Licenses](#) required equals the number of [Physical Cores](#) on the [Licensed Server](#) subject to a minimum of four per core [Licenses](#) per [Physical Processor](#).
- For enterprise editions, Customer may use any number of [Running Instances](#) of the server software on the [Licensed Server](#) in the [Physical OSE](#) and/or any number of [Virtual OSEs](#).
- For other editions Customer may use any number of [Running Instances](#) of the server software only in the [Physical OSE](#) on the [Licensed Server](#).

Server Licenses (per core) – Licensing by Individual Virtual OSE

- Customer may use any number of [Running Instances](#) of the server software in any [Virtual OSE](#) on the [Licensed Server](#), provided it acquires sufficient [Licenses](#) as described below.
- The number of [Licenses](#) required equals the number of [Virtual Cores](#) in the [Virtual OSE](#), subject to a minimum of four License per [Virtual OSE](#).
- If any [Virtual Core](#) is at any time mapped to more than one [Hardware Thread](#), Customer needs a [License](#) for each [Hardware Thread](#) to which it is mapped.

Subscriber Access Licenses (SALs) for Server Software

Access License

- Provided it acquires one or more [SALs](#) for the software, Customer may use any number of [Running Instances](#) of the server software.

- Customer must acquire a [SAL](#) for each user or device authorized by Customer to access the server software regardless of actual access.

Access Licenses

Server Software Access - Microsoft Dynamics AX 2012 R3

Self-Serve SAL

Access to server software to record time resulting solely for payroll processing; record expenses solely for reimbursement; manage personal information; and create requisitions and manage budgets related to these activities.

Subscriber Access License	Microsoft Dynamics AX 2012 R3 Self-Serve SAL (device or user)
---------------------------	---

Task SAL

Access to server software as permitted under Self-Serve [SAL](#) and to record and approve any type of time and expenses; approve invoices; approve all self-serve related transactions; operate a point of sale device or a warehouse device; and operate a store manager device.

Subscriber Access License	Microsoft Dynamics AX 2012 R3 Task SAL (device or user)
---------------------------	---

Functional SAL

Access to server software as permitted under Self-Serve [SAL](#) and Task [SAL](#) and to use established operational cycles and business processes provided by the software; create and update (a) position requisitions or (b) master data records pertaining to applicants, employees, customers, vendors, or parts catalogs; and approve all task and self-serve related transactions.

Subscriber Access License	Microsoft Dynamics AX 2012 R3 Functional SAL (device or user)
---------------------------	---

Enterprise SAL

Access to server software as permitted under Functional [SAL](#) and for full unrestricted access to all the functionality in the server software across the [ERP Solution](#).

Subscriber Access License	Microsoft Dynamics AX 2012 R3 Enterprise SAL (device or user)
---------------------------	---

Store SAL

Access to Store Server software. A Store Server [SAL](#) is required for every commerce location or store.

Subscriber Access License	Microsoft Dynamics AX 2012 R3 Store SAL
---------------------------	---

SAL Waiver

Customer does not need to acquire and assign a [SAL](#) to any user employed by third parties who access Microsoft Dynamics AX 2012 R3 solely to provide supplemental professional accounting or bookkeeping services to Customer's End Users related to the auditing process.

Microsoft Dynamics GP

Product Version and Edition	Date Available
Microsoft Dynamics GP 2018 (Processor License)	December 2017
Microsoft Dynamics GP 2018 (SAL)	December 2017

Use Rights

License Terms : Universal License Terms	Product-Specific License Terms : Yes	Prior Version : Dynamics GP 2016 R2
Access License Requirement : Yes	Additional Software : Yes	DCP Eligible : Dynamics GP (SAL)
Disaster Recovery : Yes		

Hosted Customization Licensed per Processor

In addition to SALs, Customer must acquire a Dynamics GP processor license prior to running the Hosted Customization. Customer needs to acquire only one processor License per ERP Solution, regardless of how many processors are used.

Additional Software

Microsoft Dynamics GP 2018 Windows Rich Client Software	Management Reporter 2012 for Microsoft Dynamics GP Designer Client Software	Microsoft Dynamics GP 2018 Web Client
---	---	---------------------------------------

License Model

Per Processor

Server Licenses (per processor)

1. Customer may use the server software on a Licensed Server as described in the Product-Specific License Terms, provided it acquires sufficient Licenses as described below.
2. One License is required for each Physical Processor on a Licensed Server.
3. Each License permits use of one Running Instance of the server software in one OSE.

Subscriber Access Licenses (SALs) for Server Software

Access License

1. Provided it acquires one or more SALs for the software, Customer may use any number of Running Instances of the server software.
2. Customer must acquire a SAL for each user or device authorized by Customer to access the server software regardless of actual access.

Access Licenses

Server Software Access

Full User SAL

Access to of the Starter Pack and Extended Pack functionality in the server software across the ERP Solution.

Subscriber Access License	Microsoft Dynamics GP 2018 Full User SAL (user)
---------------------------	---

Standard User SAL

Access to all of the Starter Pack functionality in the server software across the ERP Solution.

Subscriber Access License	Microsoft Dynamics GP 2018 Standard User SAL (user)
---------------------------	---

Limited User SAL

Access to the Self-Serve functionalities: "Read" access to data contained in the ERP Solution; "Write" access via the time and expense functionality; access to Management Reporter Viewer; or access to Business Portal (not available for Microsoft Dynamics GP 2015 R2 or higher).

Subscriber Access License	Microsoft Dynamics GP 2018 Limited User SAL (user)
---------------------------	--

Self-Serve User SAL

Access to "ESS Employee", "ESS Employee – BSS", "ESS PTE Employee", "ESS Employee Manager" and "ESS Purchase Requester", predefined security roles for the purpose of entering and retrieving data personalized to that user.

Subscriber Access License	Microsoft Dynamics GP 2018 Self-Serve User SAL (user)
---------------------------	---

Allocation of SALs by End User

Customer must allocate either Standard User SALs or Full User SALs to an End User's users. Customer may not allocate a combination of Full User SALs and Standard User SALs to the same End User. Customer may also allocate Limited User SALs to an End User's users.

SAL Waiver

For each End User, Customer may permit access without a SAL by one user employed by a third party solely to provide Customer's End User with supplemental professional accounting or bookkeeping services related to the auditing process.

Microsoft Dynamics NAV

Product Version and Edition	Date Available
Microsoft Dynamics NAV 2018 (Processor License)*	December 2017
Microsoft Dynamics NAV 2018 (SAL)*	December 2017

*Available only to Existing Customers through March 31, 2026. Existing Customers are Customers with an active SPLA as of March 31, 2023.

Use Rights

License Terms: Universal License Terms	Product-Specific License Terms : Yes	Prior Version : Dynamics NAV 2017
Access License Requirement : Yes	Additional Software : Yes	Client Software : Includes all Additional Software
DCP Eligible : Dynamics NAV (SAL)	Disaster Recovery : Yes	

Customization Packs per Processor

Each Processor license permits Customer to customize NAV for End User using one of the following six object types (in the following quantities): Tables (10), Codeunits (100), Pages (100), Reports (100), Queries (100), or XML Ports (100).

Additional Software

Microsoft Dynamics NAV 2018 Windows Rich Client Software	Microsoft Dynamics NAV 2017 SharePoint Client	Microsoft Dynamics NAV for iPad and iPhone App
Microsoft Dynamics NAV 2018 Web Client	Microsoft Dynamics NAV for Modern Windows App	Microsoft Dynamics NAV for Android Tablet and Phone App

License Model

Per Processor

Server Licenses (per processor)

- Customer may use the server software on a Licensed Server as described in the Product-Specific License Terms, provided it acquires sufficient Licenses as described below.
- One License is required for each Physical Processor on a Licensed Server.
- Each License permits use of one Running Instance of the server software in one OSE.

Subscriber Access Licenses (SALs) for Server Software

Access License

- Provided it acquires one or more SALs for the software, Customer may use any number of Running Instances of the server software.
- Customer must acquire a SAL for each user or device authorized by Customer to access the server software regardless of actual access.

Access Licenses

Server Software Access

Full User SAL

Access to the Starter Pack and Extended Pack functionality in the server software across the [ERP Solution](#).

Subscriber Access License	Microsoft Dynamics NAV 2018 Full User SAL (user)
---------------------------	--

Standard User SAL

Access to the Starter Pack functionality in the server software across the [ERP Solution](#).

Subscriber Access License	Microsoft Dynamics NAV 2018 Standard User SAL (user)
---------------------------	--

Limited User SAL

Access to the [ERP Solution](#), for purposes of "Read" access to data contained in the [ERP Solution](#) or "Write" access through any client accessing the [ERP Solution](#) via Microsoft Dynamics NAV API. Write access permits access to up to three table objects with the following exceptions: (a) Limited Users are not authorized to write to any of the following table objects: General Ledger Entry (table number 17), Permission Set (table number 2000000004), Permission (table number 2000000005) or Access Control (table number 2000000053); and (b) for the purpose of this clause 1.3, table objects defined in the Limited Usage Ranges section of the software's license key marked as Included in the Limited Table Access column do not count toward the three table objects.

Subscriber Access License	Microsoft Dynamics NAV 2018 Limited User SAL (user)
---------------------------	---

Allocation of SALs by End User

Customer must allocate either Standard User [SALs](#) or Full User [SALs](#) to an End User's users. Customer may not allocate a combination of Full User [SALs](#) and Standard User [SALs](#) to the same End User. Customer may also allocate Limited User [SALs](#) to an End User's users.

SAL Waiver

For each End User, Customer may permit access without a [SAL](#) by one user employed by a third party solely to provide Customer's End User with supplemental professional accounting or bookkeeping services related to the auditing process.

Customer also does not need to acquire and assign [SALs](#) to users who are End Users' customers who access Microsoft Dynamics NAV through web services unless the End User is using Microsoft Dynamics NAV in the capacity of a business process outsourcer for its customers.

Microsoft Dynamics SL

Product Version and Edition	Date Available
Microsoft Dynamics SL 2018 (SAL)*	May 2018

*Available only to Existing Customers through September 30, 2026. Existing Customers are Customers with an active SPLA as of September 30, 2023.

Use Rights

License Terms: Universal License Terms	Product-Specific License Terms: All editions	Prior Version: Dynamics SL 2015

SharePoint Server 2019 Enterprise SAL	SharePoint Server Standard CAL and SharePoint Server Enterprise CAL
	Core CAL Suite and SharePoint Server Enterprise CAL
	Enterprise CAL Suite

Permitted use of SharePoint Hosting

The requirement for SharePoint Server 2019 SALs are waived to access to content, information, and applications hosted on SharePoint Server software by External Users and internal users accessing the same content, information, and applications as the External Users. Access to, information, and applications hosted on SharePoint Server software that are limited to internal users must be licensed under SharePoint Server SALs.

SharePoint Hosting – Licensing Based on Processors Used

Physical OSE

To run Instances of the server software in the Physical OSE on a Server, you need a license for each physical processor that the Physical OSE uses.

Virtual OSE

To run Instances of the server software in Virtual OSEs on a Server, you need a license for each virtual processor* that each of those Virtual OSEs uses. If a Virtual OSE uses a fraction of a virtual processor, the fraction counts as a full virtual processor.

*A virtual processor is a processor in a virtual (or otherwise emulated) hardware system. Virtual OSEs use virtual processors. Solely for licensing purposes, a virtual processor is considered to have the same number of threads and cores as each physical processor on the underlying physical hardware system. So, for any given Virtual OSEs on a server on which each physical processor provides X logical processors, the number of licenses required is the sum of A) and B) below:

- one license for every X logical processors that Virtual OSE uses
- one license if the number of logical processors it uses is not a whole number multiple of X. "X," equals the number of cores, or where relevant, the number of threads in each physical processor.

Skype for Business Server

Skype for Business Web Apps

Server Role

Customer may use Skype for Business Web App Server Role on its servers solely in support of Software Services Customer delivers using Skype for Business Server.

Applications

Each device for which Customer acquires a Device [SAL](#) and each user for whom Customer acquires a User [SAL](#) may access and use the Skype for Business Web App software solely to support access to and use of Skype for Business Server 2019, in order to view (but not edit) documents.

Server Virtualization and Management Suites

Core Infrastructure Server (CIS) Suite

Product Version and Edition	Date Available
Core Infrastructure Server Suite Standard (Core License)	Refer to Date Available for component Products
Core Infrastructure Server Suite Datacenter (Core License)	Refer to Date Available for component Products

Use Rights

License Terms: Universal License Terms	Product-Specific License Terms : All editions
--	---

Applicable Use Rights

Customer's access and use of CIS software is governed by the applicable [License Terms](#) for the individual Products comprising the CIS software as modified by these License Terms.

Software Included with CIS Suite Standard

CIS Suite Standard includes the latest versions of Windows Server Standard and System Center Standard. For each [Server](#) on which Customer runs CIS Suite Standard software, the number of [Licenses](#) required equals the number of [Physical Cores](#) on the [Licensed](#)

Server subject to a minimum of 8 Licenses per Physical Processor. For each Server to which the required number of Licenses of CIS Suite Standard has been assigned Customer may, on the Licensed Server, at any one time:

- Use one Running Instance of the Windows Server Standard server software in the Physical OSE on the Licensed Server (in addition to one Virtual OSE), if the Physical OSE is used solely to host and Manage the Virtual OSE.
- Use System Center Standard to Manage the Physical OSE on the Licensed Server (in addition to one Virtual OSE), if the Physical OSE is used solely to host and Manage the Virtual OSE.
- Use or Manage any number of OSEs instantiated as Windows Server Containers without Hyper-V isolation on the Licensed Server.

Customer may assign additional CIS Suite Standard edition Licenses to the Licensed Server equal to the number specified above and run the server software in one additional OSE and Manage one additional OSE on the Licensed Server.

Software Included with CIS Suite Datacenter

CIS Suite Datacenter includes the latest versions of Windows Server Datacenter and System Center Datacenter. For each Server on which Customer runs CIS Suite Datacenter software, the number of Licenses required equals the number of Physical Cores on the Licensed Server subject to a minimum of 8 Licenses per Physical Processor. For each Server to which the required number of Licenses of CIS Suite Datacenter has been assigned Customer may, on the Licensed Server, at any one time:

- Use the Windows Server Datacenter server software in any number of OSEs on the Licensed Server.
- Use the System Center Datacenter server software to Manage any number of OSEs on the Licensed Server.
- Use or Manage any number of OSEs instantiated as Windows Server Containers without Hyper-V isolation on the Licensed Server.

Management License

For purposes of applying the License Terms for System Center to Customer's use of the CIS Suite software, Customer is deemed to have assigned to the Licensed Server System Center Licenses equal to the number of CIS Suite Licenses assigned to the Server.

Additional Terms

Customer may run a prior version or a down edition of any of the individual Products included in the CIS Suite as permitted in the License Terms for that Product in the SPUR. All other requirements to acquire and assign SALs to users or devices for access and management, as set forth in the SPUR, remain in full force and effect.

Cloud Platform Suite

Product Version and Edition	Date Available
Cloud Platform Suite (Host License)	August 2014
Cloud Platform Guest (Guest License)	August 2014

Use Rights

License Terms: Universal License Terms	Product-Specific License Terms: All editions	Access License Requirement: Guest
Down Editions: Guest only (2012 or earlier versions of Windows Server Standard, Windows Server Enterprise, Windows Server Datacenter, Windows Server Essentials, Windows Web Server, Windows HPC Server Operating System)	Included Technologies: Windows Server, SQL Server, System Center, Windows Azure Pack, Windows Software Components	Notices: Internet-based Features, H.264/AVC and VC-1

Restricted Use of Software Components

The Cloud Platform Suite software includes the following components: Windows Server 2012 R2, System Center 2012 R2, Windows Azure Pack for Windows Server, SQL Server 2012 Standard.

Additional Terms - Cloud Platform Suite (Host)

By acquiring a license for the Cloud Platform Suite software, Customer is not acquiring licenses for the individual software components identified above. Customer may use these software components solely as described in this section.

System Center 2012 R2

Customer must use this component only to manage the Physical OSEs and Virtual OSEs in its Host Fabric and to manage Instances of the Cloud Platform Guest (licensed separately) and/or instances of non-Microsoft operating systems that are hosted on its Host Fabric.

Windows Azure Pack

Customer must use this component for provisioning and deployment of any Physical OSE or Virtual OSE in its Host Fabric.

SQL Server 2012 Standard

Customer may use this component only to support System Center 2012 R2 and/or Windows Azure Pack. Customer may not use this component to create, configure, query, modify or otherwise use a database that is not directly used by System Center 2012 R2 and/or Windows Azure Pack.

Windows Server 2012 R2

Customer must use this component as the operating system for Physical OSEs and Virtual OSE running on its Host Fabric. In any Physical OSE or Virtual OSE that uses this component as the operating system, Customer may use all available functionality in this component to deploy, configure, manage and operate its Host Fabric. In any Physical OSE or Virtual OSE that uses this component as the operating system Customer may, however, run only the following applications solely for the following purposes:

- System Center 2012 R2 for the purposes described above;
- Windows Azure Pack for the purposes described above;
- SQL Server 2012 Standard for the purposes described above.

Customer may not run any other application for any other purpose in any Physical OSE or Virtual OSE in its Host Fabric that uses the Windows Server 2012 R2 component as its operating system.

Additional Terms - Cloud Platform (Guest)

Separate Guest Licenses

Customer must acquire a separate Microsoft Cloud Platform Guest license for each Instance of the Microsoft Cloud Platform Guest hosted on its Host Fabric.

Additional Software

For a list of additional software go to <http://go.microsoft.com/fwlink/?LinkId=290987>.

License Model

Host/Guest

The Host/Guest licensing model requires both host licenses and guest licenses, as well as SALs for users accessing certain guest software functionality. Host licenses are required for Customer's Host Fabric. Guest licenses are required for Customer's guest Virtual OSEs.

Assigning Licenses

Before using the software for Host Fabric, Customer must assign to each Server in its Host Fabric one host license for each Physical Processor in the Server. Each Server to which Customer assigns the required number of Licenses is a "licensed host server."

Software Use

Host Software

Software Customer licenses under host licenses is "host software." After Customer assigns the required number of host licenses, Customer may run any number of Instances of the host software to deploy, configure, manage and operate its Host Fabric. Use of the host software is subject to the limitations set forth in the Product Specific License Terms section.

Guest Software

Software Customer licenses under guest licenses is "guest software." Guest software consists of server software and additional software. Customer may run the guest server software only in a [Virtual OSE](#) hosted using the Hyper-V virtualization functionality of the Microsoft Cloud Platform Suite on a licensed host server. For each guest software license Customer acquires, Customer may run a single [Instance](#) of the guest server software and any number of [Instances](#) of the additional software. Additional software may run in [Physical OSEs](#) and [Virtual OSEs](#) on any number of devices and may be used only with the guest server software.

Access Licenses

Cloud Platform Suite (Host)

SAL Waiver

A [SAL](#) is not required for other devices to access the [Instances](#) of the Cloud Platform Suite software.

Cloud Platform Suite (Guest)

Server Software Access

The license terms applicable to the access of Remote Desktop Services, Application Virtualization for Remote Desktop Services, Rights Management Services and Microsoft Identity Manager functionality in the Windows Server Product Entry apply to access of these functionalities in the Cloud Platform Guest.

SQL Server

Product Version and Edition	Date Available
SQL Server 2022 Enterprise Core (Core License)	November 2022
SQL Server 2022 Standard (Core License)	November 2022
SQL Server 2022 Standard (SAL)	November 2022
SQL Server 2022 Web Core (Core License)	November 2022

Access License Requirement: SAL editions	Additional Software: All editions	Client Software: All editions
DCP Eligible: SAL editions only	Disaster Recovery: Core Editions	Down Editions: Enterprise to 2008 R2 Datacenter, or any version of Business Intelligence, Standard, Workgroup or Small Business; Standard to any version of Workgroup or Small Business
Fail-Over Rights: Core Editions	Included Technologies: Windows Software Components	License Mobility: Core Editions
Notices: Internet-based Features		

Additional Terms for SQL Server Web Core

The software may be used only to support public and Internet accessible Web pages, Web sites, Web applications and Web services. It may not be used to support line of business applications (e.g., Customer Relationship Management, Enterprise Resource Management and other similar applications).

Automatic Updates to Previous Versions of SQL Server

If the software is installed on Servers or devices running any supported editions of SQL Server prior to SQL Server 2012 (or components of any of them) this software will automatically update and replace certain files or features within those editions with files from this software. This feature cannot be switched off. Removal of these files may cause errors in the software and the original files may not be

recoverable. By installing this software on a Server or device that is running such editions Customer consents to these updates in all such editions and copies of SQL Server (including components of any of them) running on that Server or device.

Usage Feedback

SQL Server will send Usage Feedback and Crash Dumps as described in the [privacy statement](#), with the modification that this feature cannot be turned off except by End Users. Customer must [indicate](#) at the time of deployment that the deployed Instance of SQL Server has been licensed under the SPLA agreement.

License Model

Per Core (Applications)

For Products under the Per Core (Applications) License Model, Customer must choose either licensing by [Physical Core](#) on a [Server](#) or licensing by Individual [Virtual OSE](#). The terms for each are set forth below.

Server Licenses (per core) – Licensing by Physical Core on a Server

- Customer may use the server software on a [Licensed Server](#), provided it acquires sufficient [Licenses](#) as described below.
- The number of [Licenses](#) required equals the number of [Physical Cores](#) on the [Licensed Server](#) subject to a minimum of four per core [Licenses per Physical Processor](#).
- For enterprise editions, Customer may use any number of [Running Instances](#) of the server software on the [Licensed Server](#) in the [Physical OSE](#) and/or any number of [Virtual OSEs](#).
- For other editions Customer may use any number of [Running Instances](#) of the server software only in the [Physical OSE](#) on the [Licensed Server](#).

Server Licenses (per core) – Licensing by Individual Virtual OSE

- Customer may use any number of [Running Instances](#) of the server software in any [Virtual OSE](#) on the [Licensed Server](#), provided it acquires sufficient [Licenses](#) as described below.
- The number of [Licenses](#) required equals the number of [Virtual Cores](#) in the [Virtual OSE](#), subject to a minimum of four License per [Virtual OSE](#).
- If any [Virtual Core](#) is at any time mapped to more than one [Hardware Thread](#), Customer needs a [License](#) for each [Hardware Thread](#) to which it is mapped.

Subscriber Access Licenses (SALs) for Server Software

Access License

- Provided it acquires one or more [SALs](#) for the software, Customer may use any number of [Running Instances](#) of the server software.
- Customer must acquire a [SAL](#) for each user or device authorized by Customer to access the server software regardless of actual access.

Access Licenses

No Copying or Distributing Data Sets - All Editions

Customer may not copy or distribute any data set (or any portion of a data set) included in the software.

No Copying or Distributing Data Sets - All Editions

Customer may not copy or distribute any data set (or any portion of a data set) included in the software.

License Waivers - All editions

Customer does not need core Licenses or SALs for:

- any OSEs in which there are no Running Instances of software,
- any of Customer's network infrastructure devices functioning only for the purpose of transmitting network data and not running Windows Server,
- conversion of OSEs from Physical OSE to Virtual OSE, or
- any devices solely monitored or managed for the status of hardware components with respect to system temperature, fan speed, power on/off, system reset, or CPU availability.

Additional Terms for System Center Datacenter and Standard

Customer may Manage Licensed Servers using System Center Endpoint Protection, subject to the License Model terms.

Windows Server Containers without Hyper-V Isolation

Customer may Manage any number of OSEs instantiated as Windows Server Containers without Hyper-V isolation on the Licensed Server.

Additional Terms for System Center Configuration Manager, System Center Data Protection Manager, System Center Operations Manager, System Center Orchestrator and System Center Service Manager

Customer must assign Client OSE SALs to devices shared by one or more users, unless all of the users are assigned Client User SALs.

Client Software

System Center Data Protection Manager, System Center Operations Manager, System Center Orchestrator, System Center Service Manager and System Center Configuration Manager 1606

License Model

Per Core (Management)

Server Management Licenses (per core)

- Customer may use the software on any Server to Manage OSEs on a Licensed Server, provided it acquires sufficient Server licenses as described below.
- The number of Licenses required equals the number of Physical Cores on the Licensed Server, subject to a minimum of 8 Licenses per Physical Processor.
- Standard edition
 - Standard edition permits use of the software to Manage up to one OSE on the Licensed Server.

- Standard edition permits Management of the Physical OSE on the Licensed Server (in addition to one Virtual OSE), if the Physical OSE is used solely to host and Manage the Virtual OSE.
- Customer may assign additional Standard edition Licenses to the Licensed Server equal to the number specified in 2 above and Manage one additional OSE on the Licensed Server.
- Datacenter edition permits use of the server software to Manage any number of OSEs on the Licensed Server.
- OSEs running Server operating systems require Server Management Licenses.
- Customer may use the software to Manage OSEs running server operating systems only.

Subscriber Access Licenses (SALs) for Management Servers

Access License

1. Provided it acquires one or more SALs, Customer may use any number of Running Instances of the software to Manage OSEs on Licensed Devices or devices used by Licensed Users.
2. Customer must acquire a SAL for each OSE or each user of OSEs Customer uses the software to Manage.
3. SALs do not permit Management of any OSE running a server operating system.

Use Rights

License Terms: Universal License Terms	Product-Specific License Terms : All editions	Prior Version : Windows Server 2019, Windows Server 2016 Essentials
Access License Requirement : All editions	Additional Software : All editions	DCP Eligible : SALs only
Disaster Recovery : All editions	Down Editions : Datacenter to Standard or Essentials; Standard to Essentials	Notices : Internet-based Features, H.264/MPEG-4 AVC and/or VC-1, Malware protection

Required Disclosure associated with use of Windows Server for Hosting of Graphical User Interface

Desktops delivered as a service are supported under SPLA using Windows Server and Remote Desktop Services (RDS). If Customer chooses to deliver a service of this type, Customer must explicitly identify in its marketing materials that this infrastructure is being used for service delivery. The Windows Desktop Operating System cannot be used to provide a hosted client, hosted graphical user interface or desktop as a service.

Testing, Maintenance and Administrative Access -- Windows Server Datacenter and Standard

For each [Running Instance](#) in an [OSE](#) on a [Licensed Server](#), Customer may permit up to two users, in addition to those permitted under the general allowance of administrative users within its data center as set forth in the "Server administration and maintenance" section of its SPLA, to use or access the server software to directly or indirectly host a graphical user interface (using the Windows Server Remote Desktop Services functionality or other technology). This use is for the sole purpose of testing, maintenance, and administration of products licensed under Customer's SPLA. These users do not need Remote Desktop Services [SALs](#).

Additional Terms for Windows Server Essentials

Running Instances

Customer may use one [Running Instance](#) of the software in one [OSE](#), unless the [Running Instance](#) used in the [Physical OSE](#) is used only to host and manage [Virtual OSEs](#), in which case Customer may use one [Running Instance](#) in the [Physical OSE](#) and one [Running Instance](#) in a [Virtual OSE](#). Customer must run the server software within a domain where the [Licensed Servers](#) Active Directory is configured as (i) the domain controller (a single [Server](#) which contains all the flexible single master operations (FSMO) roles), (ii) the root of the domain forest, (iii) not to be a child domain, and (iv) to have no trust relationships with any other domains.

Using the Server Software

A User Account is a unique user name with its associated password created through the Windows Server Essentials Console. Customer may use up to 25 user accounts. Each user account permits a named user to access and use the server software on that [Server](#). Customer may reassign a user account from one user to another provided that the reassignment does not occur within 90 days of the last assignment.

Windows Server Essentials Connector

Customer may install and use the Windows Server Essentials Connector software on no more than 50 devices at any one time. Customer may use this software only with the server software.

Windows Server Containers without Hyper-V isolation with Windows Server 2022 Standard and Datacenter

Customer may use any number of OSEs instantiated as Windows Server Containers without Hyper-V isolation on the Licensed Server.

Additional Software

AD Migration Tool	GBUNIECN.EXE Utility
-------------------	----------------------

License Model

Per Core (OS)

Server Licenses (per core)

- Customer may use the server software on a Licensed Server, provided it acquires sufficient Server licenses as described below.
- The number of Licenses required equals the number of Physical Cores on the Licensed Server, subject to a minimum of 8 Licenses per Physical Processor.
- Standard edition
 - Standard edition permits use of the server software in one OSE on the Licensed Server.
 - Standard edition permits use of one Running Instance of the server software in the Physical OSE on the Licensed Server (in addition to one Virtual OSE), if the Physical OSE is used solely to host and Manage the Virtual OSE.
 - Customer may assign additional Standard edition Licenses to the Licensed Server equal to the number specified in 2 above and run the server software in one additional OSE on the Licensed Server.
 - Datacenter edition permits use of the server software in any number of OSEs on the Licensed Server.

Per Processor

Server Licenses (per processor)

- Customer may use the server software on a Licensed Server as described in the Product-Specific License Terms, provided it acquires sufficient Licenses as described below.
- One License is required for each Physical Processor on a Licensed Server.
- Each License permits use of one Running Instance of the server software in one OSE.

Subscriber Access Licenses (SALs) for Server Software

Access License

- Provided it acquires one or more SALs for the software, Customer may use any number of Running Instances of the server software.
- Customer must acquire a SAL for each user or device authorized by Customer to access the server software regardless of actual access.

Access Licenses

Server Software Access

Windows Server Datacenter and Standard

Windows Server Remote Desktop Functionality	
Subscriber Access License	Windows Server 2022 Remote Desktop Services SAL ¹ (user)

¹Also required for use of Windows Server to host a graphical user interface (using the Windows Server Remote Desktop Services functionality or other technology).

Azure Virtual Desktop with Windows Server Functionality	
Subscriber Access License	Windows Server 2022 Remote Desktop Services SAL ² (user)

²Customer may use Azure Virtual Desktop running Windows Server through September 30, 2025, provided it acquires one or more Windows Server 2022 Remote Desktop Services SALs. Additional Windows Server core licenses are not required under Customer's SPLA. Customer must purchase Microsoft Azure Services under a separate contract subject to the Microsoft Product Terms; Customer must also purchase Windows Server core licenses under that separate contract in order to use the Microsoft Azure Hybrid Benefit.
